November 20, 2007

Dear Sir or Madam:

I have been in the Tile & Marble restoration business for over ten years. In that time I have seen many floors that when wet they were dangerous to walk or stand on. In my research to improve the slip condition I came across the product TILE-GRIP carried by D& B Tile in West Palm Beach. This was three years ago. I have been treating slippery floors with Tile-Grip since. It is a product that has reduced the slip & falls on areas that were slippery and hazardous. It is not difficult to apply and works as advertised. Now, When customers ask if I can do something about slippery tile I say yes. I am able to make floors safer to walk on. I have used it in both Residential and Commercial buildings.

Sincerely,

Tim Carroll
